

## Create Flask Project

Date	17 November 2022
Team ID	PNT2022TMID12171
Project Name	Smart Fashion Recommender Application

The screenshot displays the Visual Studio Code interface with a Python Flask application running. The editor shows the following code in `app.py`:

```
1 from flask import Flask, render_template
2
3 app = Flask(__name__)
4
5 @app.route('/')
6 def bot():
7     return "soundar"
8
9
10 if __name__ == '__main__':
11     app.run()
```

The terminal output shows the command to run the application and the resulting output:

```
PS F:\Ahamed> f.; cd 'f:\Ahamed'; & 'C:\Program Files\Python310\python.exe' 'c:\Users\WUHAJ\.vscode\extensions\ms-python.python-2022.18.2\pythonFiles\lib\python\debugpy\adapter\..\..\debugpy\launcher' '58412' '--' 'f:\Ahamed\app.py'
* Serving Flask app 'app'
* Debug mode: off
WARNING: This is a development server. Do not use it in a production deployment. Use a production WSGI server instead.
* Running on http://127.0.0.1:5000
Press CTRL+C to quit
```

The browser window at the bottom shows the URL `127.0.0.1:5000` and the response `soundar`.
