

Assignment -3

Bucket And Watson assistant

Assignment Date	7 October 2022
Student Name	SOUNDAR M
Student Roll Number	73151921049
Maximum Marks	2 Marks

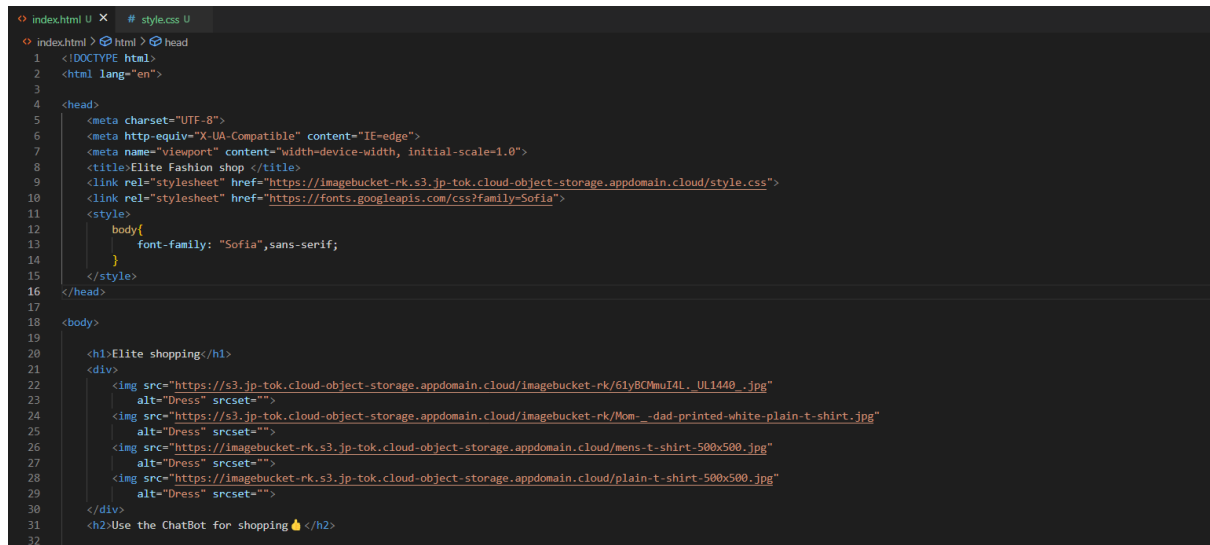

Questions:

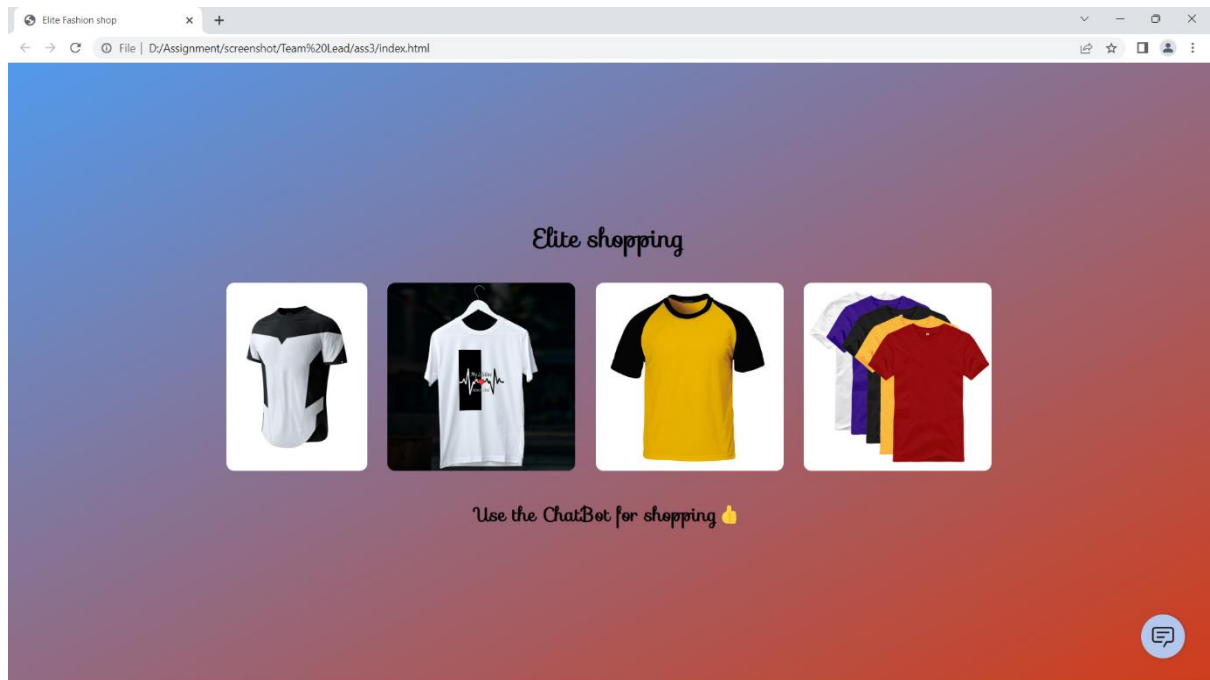

1.Create a Bucket in IBM object storage.

2.Upload an 5 images to ibm object storage and make it public. write html code to displaying all the 5 images.

Index.html

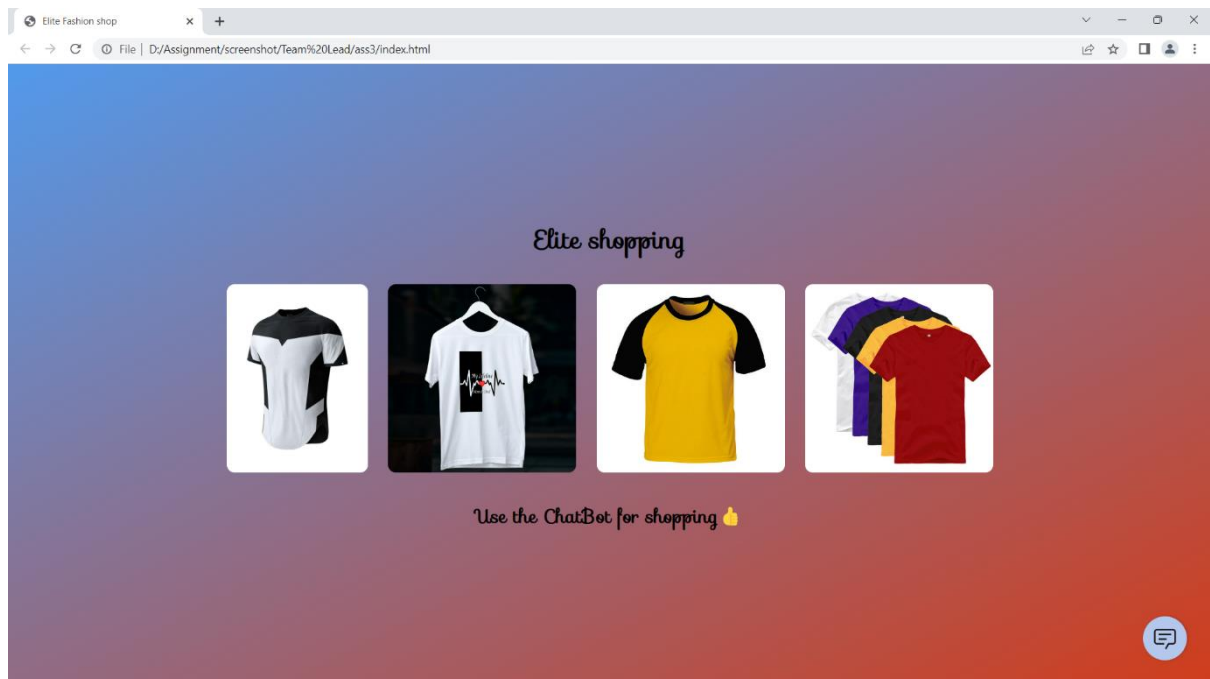

3.Upload a css page to the object storage and use the same page in your HTML code.

```

index.html U X # style.css U
index.html > html > head
1 <!DOCTYPE html>
2 <html lang="en">
3
4 <head>
5   <meta charset="UTF-8">
6   <meta http-equiv="X-UA-Compatible" content="IE=edge">
7   <meta name="viewport" content="width=device-width, initial-scale=1.0">
8   <title>Elite Fashion shop </title>
9   <link rel="stylesheet" href="https://imagebucket-rk.s3.jp-tok.cloud-object-storage.appdomain.cloud/style.css">
10  <link rel="stylesheet" href="https://fonts.googleapis.com/css?family=Sofia">
11  <style>
12    body{
13      font-family: "Sofia",sans-serif;
14    }
15  </style>
16 </head>
17
18 <body>
19
20 <h1>Elite shoppings</h1>
21 <div>
22   
24   
26   
28   
30 </div>
31 <h2>Use the ChatBot for shopping 🍷</h2>
32
33 <script>
34   window.watsonAssistantChatOptions = {
35     integrationID: "09451be0-eac2-46dd-b783-d487056346f3", // The ID of this integration.
36     region: "au-syd", // The region your integration is hosted in.
37     serviceInstanceID: "6beadec7-dfbc-491d-97f8-54700e4c09ee", // The ID of your service instance.
38     onload: function(instance) { instance.render(); }
39   };
40   setTimeout(function(){
41     const t=document.createElement('script');
42     t.src="https://web-chat.global.assistant.watson.appdomain.cloud/versions/" + (window.watsonAssistantChatOptions.clientVersion || 'latest') + "/WatsonAssistantChatEntry.js";
43     document.head.appendChild(t);
44   });
45 </script>
46 </body>
47
48 </html>

```

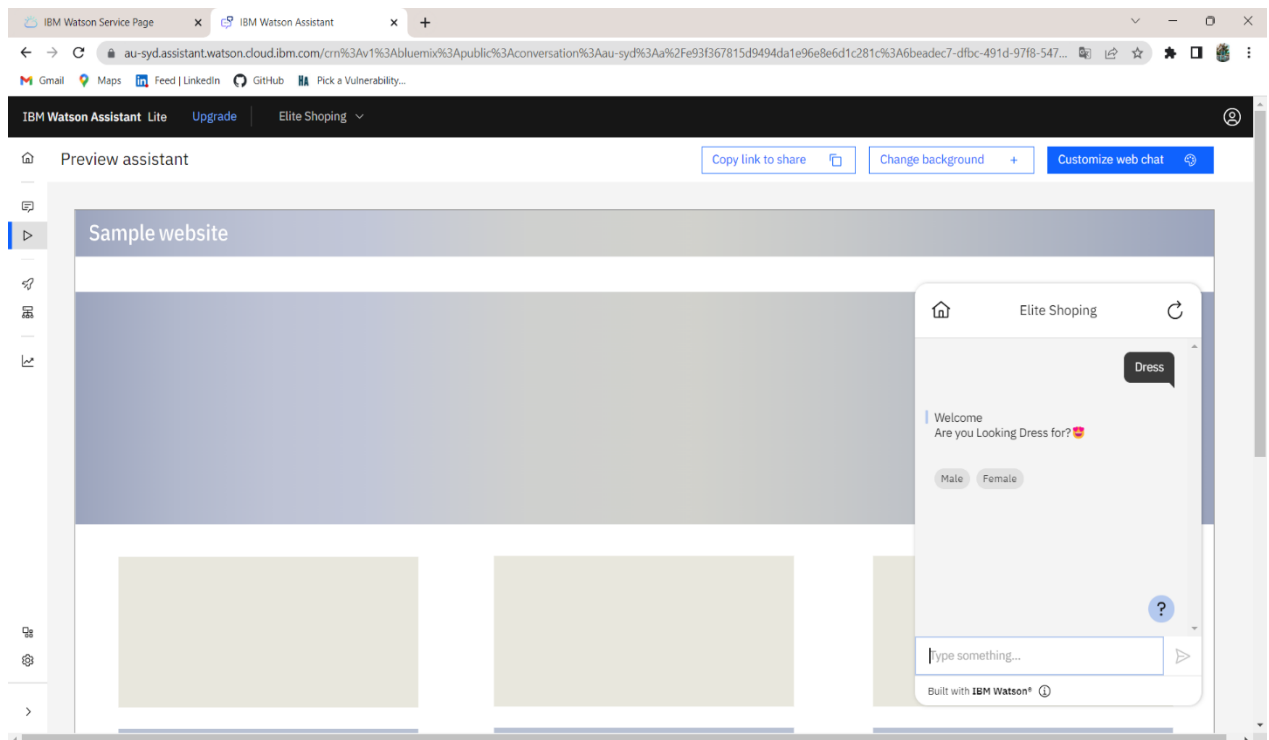

Output:-

4.Design a chatbot using IBM Watson assistant for hospital. Ex: User comes with query to know the branches for that hospital in your city. Submit the web URL of that chat bot as a assignment.

Url :- [chatbot](#)<- click

Image-

5. Create Watson assistant service with 10 steps and use 3 conditions in it. Load that script in HTML page

The screenshot displays the IBM Watson Assistant configuration interface. On the left, a conversation flow is outlined with steps and conditions:

- Step 1: Condition 'Male', response 'Thankyou for coming sir..', buttons 'Shirt', 'T shirt', action 'Continue to next step'.
- Step 2: Condition 'T shirt', response 'This step has media content', action 'Continue to next step'.
- Step 3: Condition 'Female', response 'Thankyou for coming mam..', buttons 'Chudidhar', 'Saree', action 'Continue to next step'.
- Step 4: Condition 'Chudidhar', response 'This step has media content', action 'Continue to next step'.

The main editor shows the configuration for Step 1, which is set to 'without conditions'. The assistant's response is 'Are you Looking Dress for?'. Below this, there are buttons for 'Male' and 'Female', and links for 'Edit response' and 'Edit validation'. The 'And then' section is set to 'Continue to next step'.

The screenshot shows the 'Elite Fashion shop' website. The main banner displays four t-shirt products. Below the banner, the text 'Use the ChatBot for shopping' is visible. On the right side, a chatbot interface is overlaid, titled 'Elite Shopping'. The chatbot's conversation history includes:

- Initial message: 'Welcome Are you Looking Dress for?' with buttons for 'Male' and 'Female'.
- User input: 'Male'.
- Bot response: 'Welcome sir..' with buttons for 'T shirt' and 'Shirt'.

The chatbot interface also includes a 'Type something...' input field and a 'Built with IBM Watson' logo at the bottom.
